DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 13 March 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on US patent application number 09/932,240 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

2. Claims 17-19, 21 and 23-29 allowed.

3. The following is an examiner's statement of reasons for allowance. The closest art retrieved within the search is Suzuki (US 5,796,736) and Sanada et al. (EP 0 881 560 A2).

4. Sanada taught the use of a control table used to record the device name and port identification. The main difference between the applicant's claimed 'control table' and Sanada's control table is that Sanada's table does not include the field to indicate necessary security information regarding the port being access enabled/disabled. To this end it is determined that the prior art references of Sanada and Suzuki do not teach (alone or in combination) "replacement of the connection port is detected by the storage controller on the basis of information notified from the information exchanger, and in the control table, ... identification information of the newly added input/output port and security information in which access disabled is set are registered in the control table" as claimed in independent claim 1. Therefore, the independent claim 1 contains allowable subject matter and is allowable over the prior art of record.

Art Unit: 2142

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

6. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jesus Del Castillo on 28 April 2006.

The application has been amended as follows:

Please add the paragraph below to the beginning of the specification, page 1:

Please add--

The present application is a divisional of application Serial No. 09/932,240, filed August 17, 2001, now U.S. Patent Number 7,047,290.
